

Hej Allihopa! How are you all doing? I cannot help but worry that this pandemic is tough on y'all and also confusing. At the same time, you continuously surprise me with your innovation and creativity, which makes me hopeful you'll find ways to continue thriving in your educational experience.

What are your summer plans? When I get a break from teaching it's all about... research! When the weather is warm, I just might bring my math research to one of the many great beaches we have here; proving theorems requires only pen, paper, and inspiration, so why not bring it to the beach? Yes, I think the Gothenburg area beaches are awesome, because they are a lot like the beaches in the Pacific Northwest where I grew up ☺ Like many researchers around the world, I've tried to use my mathematical skills to contribute. Together with my PhD student, we have obtained results based on evolutionary game dynamics which could be helpful. Check it out! <https://arxiv.org/abs/2004.12446v2>

I hope you will find ways to enjoy the summer and look forward to seeing you again in the fall!
